## RISK FACTORS

*In this section, the risk factors which the Issuer considers to be material risks relating to the Issuer and its subsidiaries and the Issuer's contemplated issue of the Bonds are illustrated. The Issuer's assessment of the materiality of each risk factor is based on the probability of their occurrence and the expected magnitude of their negative impact. The assessment of the materiality of each risk factor is illustrated with a rating of low, medium or high. The description of the risk factors below is based on information available and estimates made on the date of this Prospectus.*

*The risk factors are presented in categories where the most material risk factors in a category are presented first under that category. Subsequent risk factors in the same category are not ranked in order of materiality or probability of occurrence. Where a risk factor may be categorised in more than one category, such risk factor appears only once and in the most relevant category for such risk factor. Terms not defined herein shall have the same meaning as ascribed to them in the terms and conditions for the Bonds (the "Terms and Conditions").*

### **Risk factors specific and material to the Issuer**

#### ***Risks relating to the Issuer and the Group***

##### **The Group's business, results of operations and profitability are subject to risks related to developments in the global financial markets**

The Nordic markets are affected by developments in the global financial markets, which continue to experience disruptions, including increased volatility and diminished liquidity and credit availability. Concerns about credit risk (including that of sovereigns) have increased globally, especially with the presence of significant sovereign debts and/or fiscal deficits in a number of European countries and the United States. This has raised concerns regarding the financial condition of financial institutions and other corporates located in these countries, having direct or indirect exposure to these countries, and/or whose banks, customers, service providers, sources of funding and/or suppliers have direct or indirect exposure to these countries. The default, or a significant decline in the credit rating, of one or more sovereigns or financial institutions globally, could cause severe stress in the financial system generally and could adversely affect the markets in which the Group operates and the businesses and economic condition and prospects of the Group's counterparties or customers, directly or indirectly, in ways that are difficult to predict. Any such developments could limit the Group's access to the capital it requires to finance its operations.

The global Covid-19 pandemic has had adverse effects on the world economy, financial markets and consequently on the Group's activities. The most relevant risks as a result of the pandemic are the risk for higher costs for raw materials, delays in projects due to shortage of raw materials and delays in projects in general. As the future developments of the pandemic is difficult to determine, it cannot be ruled out that it will continue to pose a risk for the Group and its operations. The ongoing wars in Ukraine and Gaza have led to significant volatility in the global credit markets and on the global economy. The main risk for the Group, due to the future development in Ukraine and Gaza, and the

consequences it may have on the global economy, relates to increased and/or fluctuating raw material prices and supply chain disruptions.

For the reasons described above, adverse developments in the global financial markets could have a material adverse impact on the Group's financial position and results of operations.

The Issuer considers that the probability that the abovementioned risks materialise to be medium. If the risks would materialise, the Issuer considers the potential negative impact to be medium.

**The Group's business, results of operations and profitability are subject to risks related to general economic conditions and demographic trends in its geographical markets**

The Group is affected by macroeconomic factors such as general economic trends, regional economic development, employment rates, production rates of new premises, changes of infrastructure, inflation and interest rates in Sweden. These factors significantly impact supply and demand in the real estate market and accordingly affect occupancy rates, rent levels and gross asset values of the Group's properties. If the general economic situation weakens, the value and rental income of the Group's property portfolio may decline. The Group's property portfolio is located in Sweden and the Group operates in different geographical markets throughout Sweden.

Inflation expectations drive interest rates and thus affect the net financial result of the Group. As the Group mainly relies on short-term interest rates, it is particularly sensitive to changes in the general interest rate levels. The interest cost of debt with credit institutions, among others, is a major cost for the Group, and the Group plans to continue to partially finance its operations through debt in the future. During the financial year 2023, the Group's interest expense amounted to SEK 53 million. The Group's average interest rate as of 31 December 2023 was 7.7 per cent. Based on the conditions on 31 December 2023, a change in the Group's average interest rate of +/- one percentage point would theoretically affect the Group's profit before tax by approximately +/- SEK 8 million. A drastic rise in interest levels as was seen during 2022-2023 may have a material negative impact on the Group's profitability.

While Sweden maintains a strong labour market and elevated employment and activity rates, there can be no assurances that these positive trends will continue. Sweden's economy may also be impacted by its neighbouring countries, which could result in deterioration of the economic conditions in Sweden. Additionally, the Group's community service portfolio is affected by demographic trends such as the growing prevalence of aging populations and increasing rural-to-urban migration in the Nordic region. The demographic trends impact the level of supply and demand for the Group's properties and fluctuations in demography could have a have a material adverse effect on the Group's business, financial position, results of operations and prospects.

A decrease in demand for rental of the Group's properties in any or all of the geographical markets in which the Group's properties are located could have a material adverse effect on the Group's results of operations and profit.

The Issuer considers that the probability that the abovementioned risks materialise to be low. If the risks would materialise, the Issuer considers the potential negative impact to be medium.

### **The Group operates in a competitive market and the Group may fail to compete successfully**

The Group is active in the property industry, which is subject to substantial competition, including from community service property providers such as Samhällsbyggnadsbolaget i Norden AB, Vacse AB, Hemsö Fastighets AB, Magnolia Bostad AB, Hoivatilat AB and Stenvalvet AB. The Group's competitiveness is dependent on its ability to acquire desirable properties in attractive locations, attract and retain tenants, to anticipate future changes and trends in the industry, and to adapt swiftly to, for example, current and future market needs. Furthermore, the Group competes for tenants based on, for example, the location of the property, rents, size, accessibility, quality, tenant satisfaction, convenience and the Group's reputation.

The Group's competitors may have greater financial resources than the Group, a better capacity to withstand downturns in the market, greater access to potential acquisition targets, compete more effectively, retain skilled personnel and respond faster to changes in local markets. In addition, competitors may have a higher tolerance for lower yield requirements and more efficient technology platforms. Furthermore, the Group may need to incur additional investment costs to keep its properties competitive in relation to competitors' properties. If the Group cannot compete successfully, this can significantly impact rent levels and vacancy rates and the Group's income could be reduced.

The Issuer considers that the probability that the abovementioned risks materialise to be low. If the risks would materialise, the Issuer considers the potential negative impact to be high.

### **The Group may not be able to successfully execute some, or all, of the strategic initiatives and/or the benefits of these initiatives may not be achieved at the time or to the extent expected, or at all**

Successful execution of the Group's strategic initiatives is not assured, and the Group may fail to achieve management's guidance, targets or expectations in respect to its financial and operational targets or may not realise all or part of the benefits that it expects from its current plans or other future initiatives. No assurance can be given that the implementation of the Group's strategy and/or the achievement of its financial targets or investment objectives will be successful under current or future market conditions. The Group's approach may be modified and altered from time to time. It is therefore possible that the approach adopted to implement its strategy and achieve its financial targets and investment objectives in the future may be different from that presently expected to be used and disclosed in this Prospectus. In addition, the Group's ability to carry out acquisitions pursuant to its growth strategy, will depend on a number of factors, including its relationships with municipalities and its ability to identify acceptable targets for acquisition and obtain necessary financing. If the Group's relationships with municipalities change such that it is no longer able to take advantage of off-market transactions, it may be unable to successfully execute its strategic objectives relating to real estate development and transactions. Shifts of power and/or the local opinion may also affect the Group's ability to successfully execute its strategic objectives relating to real estate development and transactions. If changes in the political environment would occur, it could have a negative impact on the Group's business, financial position, results of operations and prospects.

If the Group is unable to achieve its targets, this could have a material adverse impact on the Group's business and results of operations.

The Issuer considers that the probability that the abovementioned risks materialise to be low. If the risks would materialise, the Issuer considers the potential negative impact to be medium.

### **Certain risks relating to the Group's business model and projects**

The Group's business consists to a large extent of real estate development projects, primarily new production, but also conversion of properties (originally intended for other purposes) to community service properties (such as elderly care, nursing homes, residential care and preschools). The types of projects carried out by the Group are generally associated with a large number of risks, such as the risk of faulty construction, risk for delays or completion, operating risks, risks relating to permissions, environmental risks, political risks, site risks etc.

In the current market situation, with high interest rates and high inflation, the Group is focusing primarily on the completion of existing projects and has reduced the amount of real estate development projects. In the event the Group's projects are delayed, this may also lead to partners and others with whom the Group has entered into agreements, regarding, among other things, real estate development or land designation, claiming damages or contractual penalty from the Group. Moreover, in these types of projects the construction costs may escalate during the time of the project, e.g. due to miscalculations with regard to the budget, unexpected delays in delivery of material, construction challenges or other factors outside the Group's control.

Furthermore, some of the properties developed by the Group are sold at an early stage to major Swedish institutions. Prior to commencing production on a project, a final property owner shall have signed a binding purchase agreement with the Group, and this buyer thus finances the project on a continual basis during the production through "forward funding". This normally entails that the Group regains the capital it invested already at the point when the buyer enters into the project, while the Group's profit is received upon completion of the project. The forward funding structure also entails that the Group's profit will decrease if the costs in the project are higher than calculated, and a greater counterparty risk (as described in section "*Credit and counterparty risk*" below), e.g. in the event the buyers ends in financial difficulties and is unable to complete the project.

Misjudging with respect to investment decisions, mismanagement of projects and failure to comply with relevant laws and regulations are additional risks (although not a comprehensive list of such) associated with the Group's business model and the projects. The Group has only a small core organization and therefore outsources many external services. The operational risk in managing the projects may, for instance, involve the choice of consultants, architects, real estate agents etc. Deficient project management and bad sourcing documentation can lead to increased costs for alterations and additional work. Rising materials prices may also render projects more expensive to a varying degree depending on construction contract form.

The Issuer considers that the probability that the abovementioned risks materialise to be medium. If the risks would materialise, the Issuer considers the potential negative impact to be low.

**The gross asset value of the Group's properties shown in the valuation reports may prove to be inaccurate and the gross asset value may decrease in the future**

The Group's properties are reported at market value in the Group's consolidated balance.

As at 31 December 2023, the gross asset value of the Group's properties was SEK 1,452 million. Property valuations represent the opinion of the independent appraiser who prepares the valuation report and the assumptions underlying the appraisals are tested, as is customary, through random sampling. Additionally, property valuations by their nature are based on a number of assumptions that may not prove to be accurate. Such assumptions include property specific assumptions regarding rent levels, occupancy rates and operating expenses and market specific assumptions regarding macroeconomic developments, general economic trends, regional economic development, employment rates, production rates of new premises, changes of infrastructure and inflation and interest rates in Sweden. It is possible that the valuations received by the Group do not accurately represent the current value of the Group's properties or reflect the amounts for which the properties could be sold. Moreover, appraisal methods that are currently generally accepted and that were used for the purpose of developing valuation reports of the Group's portfolio may in hindsight be determined to be unsuitable. It cannot be ruled out that the assumptions underlying the appraisals of the properties in the past or in the future may later be determined to have been erroneous. Accordingly, investors should not assume that the gross asset value of the Group's property as shown on the balance sheet is accurate or will not change in the future.

The real estate market and property prices are subject to fluctuations. If the gross asset value of the properties decreases, the decrease in value will adversely impact the Group's results of operations. In addition, a reduction in gross asset value could result in a breach of certain covenants in the Group's financing agreements, which in turn could result in such financings being accelerated prior to maturity and consequently affect the liquidity of the Group.

The Issuer considers that the probability that the abovementioned risks materialise to be medium. If the risks would materialise, the Issuer considers the potential negative impact to be low.

***Risks relating to the Issuer's and the Group's operations***

**The Group's business may be adversely affected if the acquisition and integration of properties and property companies is not successful**

The Group's strategy includes organic growth through direct property acquisitions as well as growth through acquisitions of companies that own properties. Acquisitions expose the Group to a number of risks. For example, when deciding to make an acquisition, the Group makes certain assumptions and determinations based on its due diligence of the properties to be acquired, as well as other information then available, including assumptions regarding future rental income and operating costs. However, these assumptions and determinations involve risks and uncertainties that may cause them to be incorrect, and therefore the Group may not realise the full benefits it expects from an acquisition. Other risks involved in the acquisition of property include risks linked to future losses of tenants, environmental conditions and technical shortcomings. The acquisition of property companies is also associated with the risk of, for example, higher taxes and the risk of legal disputes

as well has higher leverage and higher interest costs. Anticipated economies of scale and cost savings may not be realised in whole or in part or may occur later than anticipated. This may result in higher administrative costs than planned. There can also be no assurance that the systems, operations or controls required to support the expansion of the Group's business are sufficient and they may require continued development. However, in the current market situation, with high interest rates and high inflation, the Group has reduced the number of acquisitions made.

Furthermore, acquisitions of property companies can expose the Group to additional risks. These risks are mainly related to the integration of the acquisitions, such as the inability to retain key individuals, merging costs, organisation costs, unexpected costs and difficulties in achieving the anticipated synergies from the acquisition. As the Group is engaged in acquisitions on an ongoing basis, these risks may be recurrent and accordingly, acquisitions can entail significantly higher costs than originally estimated. The Group is continually exploring opportunities to acquire properties and property companies, and therefore the Group is exposed to the risk of unexpectedly increased transaction costs or cancelled acquisitions. In addition to the risks associated with the acquired properties themselves, certain acquisitions may be overly complex or difficult to integrate, thus diverting attention and resources being deployed elsewhere. Additionally, if any of the foregoing risks relating to future acquisitions materialize, it could have a material adverse impact on the Group's results of operation.

The Issuer considers that the probability that the abovementioned risks materialise to be low. If the risks would materialise, the Issuer considers the potential negative impact to be low.

**The Group is exposed to the risk that it may be unable to sell any portion of its total portfolio on favourable terms or at all**

The Group is exposed to risks arising from the illiquidity of parts of its property portfolio. Community service properties constitute a unique asset class as they have been adapted to fit specific purposes. While a very strong interest is experienced from potential investors, there is a relatively limited buyer universe and a relatively limited number of investors in this sector. As a result, although municipalities and county councils have access to financing even when financial markets are distressed through entities such as Kommuninvest in Sweden, the market for the types of properties the Group owns or may acquire in the future is characterized by relatively limited liquidity. If the Group is required to liquidate parts of its portfolio on short notice for any reason, including raising funds to support its operations or to repay outstanding indebtedness, the Group may not be able to sell any portion of its portfolio on favourable terms or at all. In the case of an accelerated sale, there may be a significant shortfall between the fair value of the property or property portfolio being sold and the price at which the Group could otherwise sell such property or property portfolio. Any such shortfall could have a material adverse effect on the Group's business, financial position, results of operations and prospects. In addition, the Group may face further difficulty in disposing of its properties due to covenants and pledges limiting asset disposals in the Group's financing agreements. These restrictions could complicate or delay any proposed property development.

The Group's business includes the ongoing disposal of properties for recycling of capital and there are risks associated with this owing to the nature of the Group's portfolio and potential difficulties finding prospective buyers.

Any of the foregoing factors could lead to properties being sold at a price considerably lower than anticipated, which could have a material adverse impact on the Group's financial position and results of operations.

The Issuer considers that the probability that the abovementioned risks materialise to be medium. If the risks would materialise, the Issuer considers the potential negative impact to be medium.

**The Group may be exposed to risks associated with its property development activities such as the timely receipt of necessary zoning changes and construction permits**

The Group's property development activities involve the identification of opportunities to develop community service properties in Sweden and the development of such projects up to the commencement of construction. The Group assesses the current status of the chosen site, its long-term prospects and conducts its due diligence. The main critical factors investigated are the property's technical condition, its net operating income and any potential legal risks. In general, the Group seeks to sell its development projects at the pre-construction phase upon zoning being granted or to enter into a joint venture with the developer to eliminate (or reduce in the case of joint ventures) the Group's exposure to construction risks.

Two of the principal risks associated with the Group's property development activities relate to its ability to obtain necessary changes to zoning and all necessary construction permits to develop the relevant site in a timely manner. Although the Group is always involved in the zoning plan process, the municipalities involved have the final say on the implementation of these plans. Additionally, there may be some relatively minor but unforeseen financial costs associated with completing the necessary zoning plans and obtaining the required planning permits. The Group acquires properties for its property development business based on its expectations regarding the possibility of rezoning. The Group's development activities also entail identifying suitable geographical areas for development projects and information from third parties may be disclosed to the Group concerning zoning plan processes and future land utilisation, which the Group then uses as the basis for its investment and project decisions. Such information may turn out to be incorrect and municipalities or decision-makers may deviate from such information, which can ultimately result in the Group carrying out projects at less than favourable geographical sites.

The Group may be required to apply to municipalities or other government agencies for various permits and registrations in order to be able to carry on its property development business and the Group acquires properties for its property development business based on its expectations of obtaining all necessary permits. Good relations with municipalities are therefore important and may change over time, potentially affecting the Group's ability to obtain changes in zoning in accordance with its development plans.

There is a risk that the Group will not be granted a vital permit, permits may not be issued promptly or are issued subject to unforeseen conditions. As a result, the Group's property development

activities may experience substantial delays, and this could negatively impact the Group's business, financial position, results of operations and prospects.

If the Group is unable to have the relevant property rezoned or if necessary permits cannot be obtained in a timely manner and without complications, there is a risk that the value of the relevant projects may be less than the Group expected which could adversely affect the Group's financial position.

The Issuer considers that the probability that the abovementioned risks materialise to be high. If the risks would materialise, the Issuer considers the potential negative impact to be low.

### **Decreases in the Group's rental income and by extension the market value of the property portfolio**

The market value of the Group's property portfolio depends on the Group's ability to maintain and increase its rental income. Thus, the Group's operations face a notable risk related to rental rates and, by extension, the amount of rental income the Group is able to generate. These rates depend on, among other things, macroeconomic conditions, demographic trends and the level of new community service properties, which could increase the supply of community service properties relative to demand. Furthermore, if the condition, location or other characteristics of the properties in the Group's property portfolio are not responsive to the demand, this may negatively affect the Group's ability to maintain and increase rent levels and total rental income.

The occupancy rate for the Group's property portfolio has a significant impact on the Group's rental income and consequently also on the Group's profitability. The Group's five largest tenants accounted for approximately 55 per cent of the total contracted rental income as of 31 December 2023 and have an average term of 7 years. There is a risk that the Group's major tenants will not renew or extend their leases when they expire, which could lead to a reduction in rental income and a lower occupancy rate in the long term. If the major tenants encounter financial difficulties or otherwise become unable to meet their obligations under any lease, this could have a significant impact on the Group as its rental income could be materially lower than estimated. For example, if the tenant in one of the Group's largest leases, which is next to expire, does not renew its lease and a vacancy in such premises arises as a result, the Group's rental income would decrease by approximately SEK 1.3 million per annum. This lease expires in 2027.

The Issuer considers that the probability that the abovementioned risks materialise to be low. If the risks would materialise, the Issuer considers the potential negative impact to be medium.

### **The Group's success, future operations and business plan depend upon its ability to attract, motivate and retain key personnel**

Being able to attract, motivate and retain qualified personnel in general and qualified officers of the Group in particular is important for the Group's success, future operations and business plan. The Group is particularly dependent on the knowledge, experience and commitment of the officers of the Group, including Dan Sehlberg, the Group's Chief Executive Officer and Petter Hallenberg, the Group's Deputy Chief Executive Officer. In order to attract, motivate and retain certain key

personnel, the Group may be required to increase compensation to such individuals, resulting in additional expenses. If the Group is not able to attract and retain qualified personnel in the future, this could have a material adverse impact on the Group's prospects.

The Issuer considers that the probability that the abovementioned risks materialise to be low. If the risks would materialise, the Issuer considers the potential negative impact to be high.

### **Insurance**

If the Group is unable to maintain its insurance cover on terms acceptable to it or if future business requirements exceed or fall outside the Group's insurance cover or if the Group's provisions for uninsured costs are insufficient to cover the final costs it could have a material negative impact on the Group's business, financial position and results of operations.

The Issuer considers that the probability that the abovementioned risks materialise to be low. If the risks would materialise, the Issuer considers the potential negative impact to be low.

### **Risk related to the Group's and the Group's financing arrangement**

The Group finances itself by incurring debt which exposes it to certain risks. There is a risk that the Group will be unable to secure financing at favourable rates, or at all, when debt falls due and needs to be refinanced. As in the future loans may need to be obtained at significantly higher costs than at present, lenders may choose not to extend the Group's loans at maturity or there may not be alternative credit facilities at the Group's disposal. Further, certain loan agreements contain provisions which may limit the Issuer's and the Group's ability to incur new debt. Additionally, the Group intends to raise debt by accessing the capital markets. Capital markets are affected by general market conditions and therefore the Group is exposed to the potential effects of adverse market conditions, such as interest rate fluctuations and inflation, which may affect the Group's ability to access capital markets.

The Group's ability to obtain financing in the future will depend upon its business, prospects and market conditions. In the event of adverse market conditions, the Group's financial performance may suffer which may reduce the availability of financing to the Group.

The Issuer considers that the probability that the abovementioned risks materialise to be medium. If the risks would materialise, the Issuer considers the potential negative impact to be medium.

### **Fluctuation in interest rates may decrease the value of the Group's properties and increase the cost financing and thereby adversely affect the Group's business**

Interest expense on the Group's indebtedness is one of the Group's main cost items. In the long-term, adverse changes in interest rates could have a significant effect on the Group's results and cash flows. Interest rates have risen significantly in Sweden during the past 24 months, which has had a negative effect on the Group's operations and profitability. It is possible that interest rates will remain at high levels or increase in the future. Any increase in interest rates may have a negative effect on the Group's portfolio and may require the Group to record fair value adjustment losses. Such losses

would result in a corresponding decrease in the value of the Group's properties as reported on its balance sheet and in the Group's fair values and increases in the Group's loan to value. Any changes in interest rates may also affect the gross asset value of the Group's properties. Materialisation of any of the above risks could have a material adverse impact on the Group's business, financial position, results of operations and prospects.

The Issuer considers that the probability that the abovementioned risks materialise to be medium. If the risks would materialise, the Issuer considers the potential negative impact to be medium.

### **Credit and counterparty risk**

Where there is a risk for the Group's counterparties being unable to fulfil their financial obligations towards the Group, there is a credit risk. The Group's current and potential customers and other counterparties may get in a financial situation where they cannot pay the agreed fees or other amounts owed to the Group as they fall due or otherwise abstain from fulfilling their obligations. The Group's use of "forward funding" purchase agreements, as described above, also entails a credit risk as, *inter alia*, the buyer may experience financial difficulties and become unable to carry the increased costs. This could lead to delays and increased costs for the Group. If the Group's counterparties cannot fulfil their obligations towards the Group, it could have a negative impact on the Group's operations earnings and financial position.

The Issuer considers that the probability that the abovementioned risks materialise to be low. If the risks would materialise, the Issuer considers the potential negative impact to be low.

### ***Risks related to legal, regulatory and corporate governance issues***

#### **The Group's tax situation may be adversely affected if changes are made in taxation legislation**

The Group operates through a number of subsidiaries in Sweden. The handling of tax issues within the Group is based on interpretations of current taxation legislation, tax treaties and other taxation regulations in the countries concerned, and the determinations of the affected tax agencies. From time to time, the Group and its subsidiaries are subject to tax audits and reviews. There is a risk that tax audits or reviews will result in additional tax being applied, for example with regard to previous acquisitions, mergers, splits and corporate restructurings, transactions with employees, interest deductions and deductions for improvement expenditure. On 30 March 2017, the Swedish government presented a law proposal (*SOU 2017:27*) that, if enacted, is likely to affect the future taxation of real estate investments. The proposal includes, *inter alia*, that the deferred tax liability related to the difference between tax residual value and market value on properties will be triggered upon a change of control of a real estate owning company and that indirect sales of properties would be subject to stamp duty. If the law proposal would be implemented in its current wordings, this could imply tax payable upon all of the Group's future disposals of property-owning companies.

If the Group's interpretations of taxation legislation, tax treaties and other taxation regulations or their applicability are incorrect, if one or more government agencies are successful in making adverse adjustments to the tax payable for a business unit within the Group, or if the current legislation,

treaties, rules or interpretations thereof change, or administrative practices in respect thereof change, including those with retrospective application, the Group's previous and current management of tax issues may be challenged. If the tax agencies are successful in their claims, this could lead to an increased tax expense (including a tax surcharge and interest) which could have a material negative impact on the Group's results of operations.

The Issuer considers that the probability that the abovementioned risks materialise to be low. If the risks would materialise, the Issuer considers the potential negative impact to be low.

### **The Group may fail to comply with applicable regulations and risks being involved in legal and administrative proceedings**

The Group operates across various geographical markets and its business must comply with the requirements set out in a number of codes, acts and regulations in the jurisdictions in which it operates. Such regulations include, *inter alia*, zoning regulations, building standards and safety regulations. For example, in Sweden, the Group's business is regulated by, amongst others, the Swedish Environmental Code (Sw. *Miljöbalken* (1998:808)) and the Swedish Planning and Building Act (Sw. *Plan- och bygglagen* (2010:900)). Failure to comply with the Swedish Environmental Code could result in environmental sanction charges between SEK 1,000 and SEK 1,000,000, while a violation of the Swedish Planning and Building Act could prohibit the continuation of building work on the Group's properties, the imposition of fees or the removal of any additions made in the course of a renovation done without the required permit. New acts and regulations, or a change in the application of existing legislation that the Group must take into account in its operations, or changes that affect the operations of the Group's tenants, may negatively impact the Group's business, financial position, results of operations and prospects. In addition, there is a risk that the Group's interpretation of existing codes, acts and regulations may be incorrect, or that the accepted interpretation of these codes could change in the future which could cause the Group to incur increased costs or face the risk of material fines or penalties.

The Group also risks becoming involved in legal or administrative proceedings, which could result in significant claims for damages or other demands for payment, including claims for damages from customers or competitors for breaches of competition law. It is inherently difficult to predict the outcome of legal, regulatory and other adversarial proceedings or claims and if the outcome of any future legal or administrative proceeding turns out to be negative for the Group, this could have a material adverse impact on the Group's financial position and results of operations.

The Issuer considers that the probability that the abovementioned risks materialise to be low. If the risks would materialise, the Issuer considers the potential negative impact to be low.

### **The Group's operations are exposed to environmental risks and must comply with various health, safety and environmental regulations which may adversely affect the Group's operations and future earnings**

The Group's operations in property management and property development carry environmental risks and the Group is subject to environmental regulations that may impose liability if the Group

fails to comply. Although the Group conducts inspections during the acquisition of individual properties, there is a risk that environmental regulations were not complied with. Under current environmental legislation in the jurisdiction in which the Group operates, an operator that has contributed to the contamination of a property is also liable for its remediation. If the operator cannot carry out or pay for remediation of the property, the party who acquired the property and who, at the time of acquisition, knew about or ought to have known about the contamination is liable for the remediation. This means that under certain circumstances, the Group may be ordered to restore the property to a state that is compliant with environmental legislation. This may involve solid decontamination or remediation in respect of the presence of, or suspicion of the presence of, contaminants in the soil, catchment areas or groundwater. The costs to the Group of investigation, removal or remediation required to comply with environmental regulations may be substantial and therefore such orders may negatively impact the Group's earnings, cash flow and financial position. Furthermore, any future changes to the laws, regulations and requirements from authorities in the environmental sector could result in increased costs for the Group with respect to sanitation or remediation regarding currently held or future acquired properties. Such changes could also result in increased costs or delays for the Group in carrying out any of its development projects.

The Group is and may also be subject to further regulation in areas such as occupational health and safety, the handling and/or removal of asbestos, as well as acts and regulations limiting emissions of greenhouse gases such as through energy and electricity consumption. Non-compliance with such acts and regulations in any of the jurisdictions in which the Group operates may result in the government issuing orders for enforcement measures, imposing fees or fines, and, in some cases, even imposing restrictions on the operations of the Group, which may be severe.

Furthermore, contamination may also be detected on properties and in buildings, in particular during renovation processes or when buildings are upgraded for environmental certification. The discovery of any contaminants or residual pollution in connection with the lease or sale of properties could trigger claims for rent reductions, damages or lease terminations. Measures to remove such contaminants or remediate any pollution can be required as part of the Group's ongoing operations and may, depending on the extent of contamination, involve conservable costs and have a material adverse impact on the Group's results of operation.

The Issuer considers that the probability that the abovementioned risks materialise to be low. If the risks would materialise, the Issuer considers the potential negative impact to be low.

### **The Issuer is dependent on its subsidiaries.**

The Issuer is the parent company of the Group whose operations are mainly conducted through subsidiaries. The Issuer's ability to make interest payments on any interest-bearing debt (including the Bonds) will be affected by the ability of the subsidiaries to pay dividends and transfer funds to the Issuer. The Issuer is therefore dependent on its subsidiaries to meet its payment obligations under the Bonds. Transfers of funds to the Issuer from the subsidiaries may be restricted or prohibited entirely as a result of legal and contractual restrictions on the respective subsidiaries. In particular, certain subsidiaries are subject to distribution restrictions under their banking arrangements, prohibiting them from upstreaming cash to the Issuer. Furthermore, the subsidiaries are separate legal

entities with no responsibility to discharge the Issuer's obligations to its creditors. If the subsidiaries do not pay dividends, or are prevented from providing liquidity to the Issuer due to other circumstances or conditions, laws or regulations, there is a risk that the Issuer will be unable to meet its payment obligations to the Bondholders or other creditors, which could result in the Group's financial indebtedness being subject to immediate repayment and, subsequently, a right for creditors to enforce transaction security.

The Issuer considers that the probability that the abovementioned risks materialise to be low. If the risks would materialise, the Issuer considers the potential negative impact to be low.

### **Risk factors specific and material to the Bonds**

#### **The claims of holders of the Bonds are structurally subordinated to those of certain other creditors of the Issuer and to creditors of the Issuer's subsidiaries**

All assets are owned, and all revenues are generated in, the subsidiaries or the associated companies of the Issuer. Generally, lenders and other creditors of the Issuer's subsidiaries or associated companies are entitled to payment of their claims from the assets of such subsidiaries or associated companies before these assets would be available for distribution to the Issuer, as direct or indirect shareholder, which would then allow for the Issuer to make payments under the Bonds. It should be noted that the Issuer and its subsidiaries and associated companies have the possibility to incur additional financial indebtedness to finance, *inter alia*, acquisitions, investments and development of properties. Thus, the Bonds will constitute structurally subordinated liabilities of the Issuer's subsidiaries and associated companies, meaning that creditors of claims against a subsidiary or associated company will be entitled to payment out of the assets of such subsidiary or associated company before the Issuer. The subsidiaries and associated companies are legally separate entities and distinct from the Issuer and have no obligation to settle or fulfil the Issuer's obligations. Any debt that the Issuer's subsidiaries may incur in the future will also rank structurally senior to Bonds.

A significant part of the Group's assets and revenues are generated by the Issuer's subsidiaries or associated companies. The ability of the subsidiaries and associated companies to make payments to the Issuer is restricted by, among other things, the availability of funds, corporate restrictions and local law. Furthermore, in the event of insolvency, liquidation or a similar event relating to one of the subsidiaries or associated companies, all creditors of such subsidiary or associated company would be entitled to payment in full out of the assets of such subsidiary and/or associated company before any entity within the Group, as a shareholder, would be entitled to any payments.

The Group or its assets may not be protected from any actions by the creditors of any subsidiaries or associated company of the Group, whether under bankruptcy law, by contract or otherwise. In addition, default by, or the insolvency of, certain subsidiaries or associated companies of the Group could result in the obligation of the Group to make payments under parent company financial or performance guarantees in respect of the obligations of such subsidiaries or associated companies, or in the occurrence of cross defaults on certain borrowings of the Group.

The Issuer considers that the probability that the abovementioned risks materialise to be low. If the risks would materialise, the Issuer considers the potential negative impact to be high.

### **Risks related to the Bonds' floating rate structure**

The value of the Bonds depends on several factors, one of the most significant in the long term being the market interest rates. The Bonds bear a floating rate interest at the rate of a base rate plus a margin. The initial base rate for the Bonds is 3-month STIBOR. Hence, the interest rate is to a certain extent adjusted for changes in the general interest rate levels. There is a risk that an increase in the general interest rate levels will adversely affect the value of the Bonds. The general interest rate level is to a high degree affected by the state of the international economy and is outside the Group's control.

Further, the process for determining interest-rate benchmarks, such as STIBOR, is subject to a number of statutory rules and other regulations. The most extensive initiative in this respect is the Benchmark Regulation (Regulation (EU) 2016/1011 of the European parliament and of the council of 8 June 2016 on indices used as benchmarks in financial instruments and financial contracts or to measure the performance of investment funds and amending Directives 2008/48/EC and 2014/17/EU and Regulation (EU) No 596/2014) ("the Benchmark Regulation"). The implementation of the Benchmark Regulation has led to the discontinuation of certain benchmarks that were previously used. There is a risk that also STIBOR will be discontinued, or that alternative benchmark rates will dominate market practice, leading to uncertainties in relation to the interest rate payable in relation to the Bonds. Increased or altered regulatory requirements and risks associated with the Benchmark Regulation involve inherent risks, as the effects cannot be fully assessed at this point in time. There is a risk that developments in relation to STIBOR will cause volatility in STIBOR, which would affect the interest rate for the Bonds.

Should STIBOR be discontinued or cease to be provided, the Terms and Conditions provides for an alternative calculation of the interest rate for the Bonds. There is a risk that such alternative calculation results (including the determination of any Successor Base Rate) in an interest rate which is less advantageous for the Bondholders or that such interest rate does not meet market interest rate expectations.

### **Credit risks**

Investors in the Bonds are exposed to credit risk in relation to the Issuer. An investor's possibility to obtain payment in accordance with Terms and Conditions is therefore dependent on the Issuer's ability to meet its payment obligations. The Issuer's financial position, i.e. its ability to meet its payment obligations, is affected by several factors, such as the risk that the Group's counterparties are unable to fulfil their financial obligations towards the Group (as further described in section "*Credit and counterparty risk*" above). An increase in credit risk for the Bonds may also cause the market to price the Bonds with a higher risk premium, which could adversely affect the value of the Bonds.

The Issuer considers that the probability that the abovementioned risks materialise to be low. If the risks would materialise, the Issuer considers the potential negative impact to be medium.

### **Refinancing risks**

The Group may eventually be required to refinance certain or all of its outstanding debt, including the Bonds. The Group's ability to successfully refinance its debt is dependent on the conditions of the capital markets and its financial condition at such time. The Group's access to financing sources may not be available on favourable terms, or at all. The Group's inability to refinance its debt obligations on favourable terms, or at all, could have a material adverse effect on the Group's business, financial condition and results of operations and on the Bondholders' recovery under the Bonds.

The Issuer considers that the probability that the abovementioned risks materialise to be low. If the risks would materialise, the Issuer considers the potential negative impact to be medium.

### **Ability to comply with the Terms and Conditions**

The Group is required to comply with the Terms and Conditions. Events beyond the Group's control, including changes in the economic and business conditions in which the Group operates, may affect the Group's ability to comply with, among other things, the undertakings set out in the Terms and Conditions. A breach of the Terms and Conditions could result in a default under the Terms and Conditions, which could lead to an acceleration of the Bonds. This would require the Issuer to prepay the Bondholders at the applicable call premium. It is possible that the Issuer will not have sufficient funds at the time of the prepayment to make the required redemption of Bonds.

The Issuer considers that the probability that the abovementioned risks materialise to be low. If the risks would materialise, the Issuer considers the potential negative impact to be medium.

### **Market price of Bonds may be volatile**

The market price of the Bonds could be subject to significant fluctuations in response to actual or anticipated variation in the Group's operating results and those of its competitors, adverse business developments, changes to the regulatory environment in which the Groups operates, changes in financial estimates by securities analysts and the actual or expected sale of a large number of Bonds, as well as other factors. In addition, in recent years the global financial markets have experienced significant price and volume fluctuations, which, if repeated in the future, could adversely affect the market price of the Bonds without regard to the Group's operating results, financial conditions or prospects.

The Issuer considers that the probability that the abovementioned risks materialise to be medium. If the risks would materialise, the Issuer considers the potential negative impact to be medium.

## **Majority owners**

The Issuer is controlled by two Main Shareholders whose interest may conflict with those of the Bondholders, particularly if the Group encounters difficulties or is unable to pay its debts as they fall due. The Main Shareholders have legal power to control a large amount of the matters to be decided by vote at a shareholder's meeting. For example, the Main Shareholders will have the ability to elect the board of directors. Furthermore, the Main Shareholders may also have an interest in pursuing acquisitions, divestitures, financings or other transactions that, in their judgment, could enhance their equity investments, although such transactions might involve risks to the Bondholders. There is nothing that prevents a shareholder or any of its affiliates from acquiring businesses that directly compete with the Group. If such an event were to arise, it could have a material negative impact on the Group's business, financial position and results of operations.

The Issuer considers that the probability that the abovementioned risks materialise to be low. If the risks would materialise, the Issuer considers the potential negative impact to be low.

## **Loans to subsidiaries not wholly-owned by the Issuer and other companies where the Issuer, directly or indirectly hold a minority interest**

A part of the Group's strategy is to invest in joint ventures (a "JV Company"), and there are no restrictions in the Terms and Conditions for the Group to invest in such JV Companies. A JV Company may be controlled by a majority shareholder not being, directly or indirectly, wholly-owned by the Issuer and whose interest may conflict with those of the Group and the Bondholders, particularly if such JV Company encounters difficulties or is unable to pay its debts as they fall due. A majority shareholder could, as described in section "*Majority owners*" above, have interest which may conflict with those of the Issuer and the Bondholders, even though the Group may have made substantial investments in such JV Company, and the Groups investments in such JV companies could, in part or whole, be lost. If such an event would arise, it could have a material negative impact on the Group's business, financial position and results of operations.

It should also be noted that a JV company, which is not considered to be a "Subsidiary" under the Terms and Conditions, is not subject to the undertakings and event of default catalogue, including insolvency and insolvency proceedings, set out in the Terms and Conditions, and any action taken by, or occurring to, such JV Company would not trigger an event of default under the Terms and Conditions, and such actions or potential events might involve risks to the Bondholders, and ultimately the position of the Bondholders.

The Issuer considers that the probability that the abovementioned risks materialise to be low. If the risks would materialise, the Issuer considers the potential negative impact to be medium.

## **Risks relating to the transaction security**

If a Group company, whose shares have been pledged in favour of the Bondholders, is subject to any foreclosure, dissolution, winding-up, liquidation, recapitalisation, administrative or other bankruptcy or insolvency proceedings, the shares that are subject to such pledge may then have a limited value because all of the Group companies' obligations must first be satisfied, potentially leaving little or

no remaining assets in the subsidiary for the Bondholders. As a result, there is a risk that the Bondholders will not recover the full value (or any value) of the shares. In addition, the value of the shares subject to pledges may decline over time.

The value of any Material Intra-Group Loan, which is subject to security in favour of the Bondholders, is largely dependent on the relevant debtor's ability to repay such Material Intra-Group Loan. Should the relevant debtor be unable to repay its debt obligations upon an enforcement of a pledge of the Material Intra-Group Loan, the Bondholders may not recover the full or any value of the security granted over the Material Intra-Group Loan.

If the proceeds of an enforcement are not sufficient to repay all amounts due under or in respect of the Bonds, then the Bondholders will only have an unsecured claim against the Issuer and its remaining assets (if any) for the amounts which remain outstanding under or in respect of the Bonds.

As security over any Material Intra-Group Loans (other than Material Intra-Group Loans granted to Sehlhall Holding) shall not be perfected until an acceleration of the Bonds in accordance with the Terms and Conditions, there is a risk that the security over such Material Intra-Group Loans may not be enforceable and that it may become subject to claw-back claims. Hence, there is a risk that the Bondholders will not be able to benefit from the unperfected security over any Material Intra-Group Loans, which could adversely affect the Bondholders' recovery under the Bonds.

The Issuer considers that the probability that the abovementioned risks materialise to be low. If the risks would materialise, the Issuer considers the potential negative impact to be medium.

### **Risks relating to the enforcement of transaction security**

Although the obligations under the Bonds will be secured by first priority pledges over all shares in each Initial Holding Company and each Additional Holding Company, all present and future Material intra-Group Loans (including security over any new Material Intra-Group Loans) and the Escrow Account, it is not certain that the proceeds of any enforcement of the relevant security would be sufficient to satisfy all amounts then owned to the Bondholders.

The Issuer considers that the probability that the abovementioned risks materialise to be low. If the risk would materialise, the Issuer considers the potential negative impact to be medium.

### **Risk relating to the guaranteee**

Although the obligations under the Bonds are secured by a guarantee provided by the Guarantor, there is a risk that the Guarantor does not have sufficient funds to fulfil the Issuer's obligations at the relevant time. Further, the Guarantor is not prohibited under the Terms and Conditions to provide additional guarantees to members of the Group or other project entities (including entities where the Group only have a minority interest). Furthermore, if the Guarantor provides additional guarantees

or other obligations and liabilities there is a risk that the Guarantor cannot fulfil its obligations towards the Bondholders.

The Issuer considers that the probability that the abovementioned risks materialise to be low. If the risks would materialise, the Issuer considers the potential negative impact to be medium.

### **Security over assets granted to third parties**

The Group may, subject to limitations, incur additional financial indebtedness and provide additional security for such indebtedness. If security is granted in favour of a third party debt provider, such as a credit institution, the Bondholders will, in the event of bankruptcy, reorganisation or winding-up of the Issuer, be subordinated in right of payment out of the assets being subject to security provided to such third party debt provider. In addition, if any such third party debt provider holding security provided by the Group would enforce such security due to a default by any Group company under the relevant finance documents, such enforcement could have a material adverse effect on the Group's assets, operations and ultimately the position of the Bondholders.

The Issuer considers that the probability that the abovementioned risks materialise to be low. If the risks would materialise, the Issuer considers the potential negative impact to be medium.

### **Currency risks**

The Bonds will be denominated and payable in SEK. If Bondholders in the Bonds measure their investment return by reference to a currency other than SEK, an investment in the Bonds will entail foreign exchange-related risks due to, among other factors, possible significant changes in the value of the SEK relative to the currency by reference to which investors measure the return on their investments could cause a decrease in the effective yield of the Bonds below their stated coupon rates and could result in a loss to investors when the return on the Bonds is translated into the currency by reference to which the investors measure the return on their investments. Government and monetary authorities may impose (as some have done in the past) exchange controls that could adversely affect an applicable exchange rate or the ability of the Issuer to make payments in respect of the Bonds. As a result, there is a risk that investors may receive less interest or principal than expected, or no interest or principal.

The Issuer considers that the probability that the abovementioned risks materialise to be low. If the risks would materialise, the Issuer considers the potential negative impact to be low.

### **Early redemption and put options**

Under the Terms and Conditions the Issuer has the possibility to redeem all outstanding Bonds before the final redemption date. If the Bonds are redeemed before the final redemption date, the holders of the Bonds have the right to receive an early redemption amount which exceeds the nominal amount in accordance with the Terms and Conditions. However, there is a risk that the market value of the Bonds is higher than the early redemption amount and that it may not be possible for the Bondholders

to reinvest such proceeds at an effective interest rate as high as the interest rate on the Bonds and might only be able to do so at a significantly lower rate.

According to the Terms and Conditions, the Bonds are subject to prepayment at the option of each bondholder (put options) if (a) the Bonds have not been admitted to trading on Nasdaq Stockholm (or any other Regulated Market) within 60 days of the first issue date or (b) one or more persons (other than a Main Shareholder (as defined in the Terms and Conditions)) acting together, acquire control over the Issuer and where “control” means (A) acquiring or controlling, directly or indirectly, more than 50.00 per cent. of the votes of the Issuer, or (B) the right to, directly or indirectly, appoint or remove the whole or a majority of the directors of the board of directors of the Issuer. The Bonds are further subject to prepayment at the option of each bondholder if, following an initial public offering of the ordinary shares of the Issuer, the shares in the Issuer are delisted. There is, however, a risk that the Issuer will not have sufficient funds at the time of such prepayment to make the required prepayment of the Bonds which could adversely affect the Issuer, e.g. by causing insolvency or an event of default under the Terms and Conditions, and thus adversely affect all Bondholders and not only those that choose to exercise the options.

The Issuer considers that the probability that the abovementioned risks materialise to be medium. If the risks would materialise, the Issuer considers the potential negative impact to be medium.

#### **No action against the Issuer and Bondholders’ representation**

In accordance with the Terms and Conditions, the agent (being on the first issue date Nordic Trustee & Agency AB (publ)) (the “Agent”) will represent all Bondholders in all matters relating to the Bonds and the Bondholders are prevented from taking actions on their own against the Issuer. Consequently, individual Bondholders do not have the right to take legal actions to declare any default by claiming any payment from or enforcing any security granted by the Issuer and may therefore lack effective remedies unless and until a requisite majority of the Bondholders agree to take such action. However, there is a risk that an individual bondholder, in certain situations, could bring its own action against the Issuer (in breach of the Terms and Conditions) which could negatively impact an acceleration of the Bonds or other action against the Issuer.

To enable the Agent to represent Bondholders in court, the bondholder and/or their nominees may have to submit a written power of attorney for legal proceedings. The failure of all Bondholders to submit such a power of attorney could negatively affect the legal proceedings.

Under the Terms and Conditions, the Agent will in some cases have the right to make decisions and take measures that bind all Bondholders. Consequently, the actions of the Agent in such matters could impact a bondholder’s right under the Terms and Conditions in a manner that would be undesirable for some Bondholders.

The Issuer considers that the probability that the abovementioned risks materialise to be low. If the risks would materialise, the Issuer considers the potential negative impact to be medium.

### **Bondholders' meeting**

The Terms and Conditions include certain provisions regarding Bondholders' meeting and written procedures. Such meetings and procedures may be held in order to resolve on matters relating to the Bondholders' interests. The Terms and Conditions will allow for stated majorities to bind all Bondholders, including Bondholders who have not taken part in the meeting or procedure and those who have voted differently to the required majority at a duly convened and conducted Bondholders' meeting or written procedure. Consequently, the actions of the majority in such matters could impact a bondholder's right in a manner that would be undesirable for some of the Bondholders.

The Issuer considers that the probability that the abovementioned risks materialise to be low. If the risks would materialise, the Issuer considers the potential negative impact to be medium.

### **Risks relating to the clearing and settlement in Euroclear's book-entry system**

The Bonds are affiliated to Euroclear's account-based system, and no physical notes will be issued. Clearing and settlement relating to the Bonds is carried out within Euroclear's book-entry system as well as payment of interest and repayment of the principal. Investors are therefore dependent on the functionality of Euroclear's account-based system and any problems thereof could have an adverse effect on the payment of interest and repayment of principal under the Bonds.

The Issuer considers that the probability that the abovementioned risks materialise to be low. If the risks would materialise, the Issuer considers the potential negative impact to be low.

### **Secondary market and liquidity risk**

The Issuer shall ensure that the Bonds are admitted to trading on the sustainable bond list of Nasdaq Stockholm (or any other Regulated Market) within sixty (60) days from the Issue Date. Thus, the Issuer will apply for listing of the Bonds at Nasdaq Stockholm. However, there is a risk that the Bonds will not be approved for listing in time (or at all).

If the Issuer fails to procure listing in time, Bondholders will be entitled to prepayment at the option of each bondholder, see further under section "*Early redemption and put options*" above. Further, if the Issuer fails to procure listing in time, investors holding Bonds on an investment savings account (Sw. *ISK* or *IS-konto*) will no longer be able to hold the Bonds on such account, thus affecting such investor's tax situation.

Even if the Bonds are admitted to trading, there may be a lack of demand for, and trade in, the Bonds. This can result in investors being unable to sell their Bonds at a desired time or to a return which is comparable to similar investments that have an existing and functioning secondary market. This lack of an efficient marketplace and a liquid secondary market may adversely affect the market value of the Bonds.

The Issuer considers that the probability that the abovementioned risks materialise to be medium. If the risks would materialise, the Issuer considers the potential negative impact to be medium.

## **Risks relating to sustainable bonds**

The Issuer intends to use the net proceeds of the issue of the Bonds in accordance with the Sustainability Bond Framework. However, there is currently no clear definition of, legal or otherwise, or market consensus as to what constitutes a “sustainable” or an equivalently-labelled project. Accordingly, there is a risk that any projects, asset or uses defined in the Sustainability Bond Framework will not meet current or future investor expectations regarding such “sustainable” or other equivalently-labelled objectives, in particular as future developments or legal requirements as to the definitions of “sustainable”, whether according to applicable law or regulations or by such investor’s own by-laws, other governing rules or investment portfolio mandates, may change.

The Terms and Conditions will contain certain undertakings in respect of the Sustainability Bond Framework, including to use the proceeds in accordance with the Sustainability Bond Framework and to publish a report in relation thereto. A failure by the Issuer to comply with the undertakings relating to the Sustainability Bond Framework does not give the Bondholders a right to accelerate the Bonds or require that the Issuer repurchase the Bonds.

Should the Issuer fail to use the net proceeds in accordance with the Sustainability Bond Framework, there is a risk that Bondholders consequently would be in breach of any investment criteria, mandates or guidelines with which a bondholder is required to comply with and could result in remedies under the relevant investment criteria, mandates or guidelines, which could result in investors facing, *inter alia*, claims or reputational damages. While the Issuer shall use an amount equal to the net proceeds from the issue of the Bonds in accordance with its Sustainability Bond Framework, there is a risk that circumstances beyond the Issuer’s control, as, for instance, circumstances relating to general economic conditions or the developments in the global financial markets result in that the projects funded by the net proceeds may not be implemented in the intended manner (*see Risk factors “The Group’s business, results of operations and profitability are subject to risks related to general economic conditions and demographic trends in its geographical markets” and “The Group’s business, results of operations and profitability are subject to risks related to developments in the global financial markets” above*).

There is further a risk that circumstances beyond the Issuer’s control result in that such projects may not be completed within any specified period (or at all) or with the results or outcome originally expected by the Issuer. Any such event or failure by the Issuer will not, as previously mentioned, constitute an event of default under the Bonds.

Due to the rapidly changing market conditions for ESG securities, there is a risk that the expectations of current or future investors will not be met which could negatively affect the secondary trading of the Bonds. Furthermore, should such market conditions significantly change, there is a risk that a bondholder cannot trade its Bonds at attractive terms, or at all.

The Issuer considers that the probability that the abovementioned risks materialise to be low. If the risks would materialise, the Issuer considers the potential negative impact to be medium.

## **Sustainability Bond Framework**

As part of its ESG efforts, the Issuer has established a sustainability financing framework (the “**Sustainability Bond Framework**”) to further integrate its core sustainability objectives with its financing activities. The Sustainability Bond Framework was published in April 2022 and is available on the Issuer’s website ([link](#)), where any updates to the Sustainability Bond Framework will also be made available. An amount equivalent to the Net Proceeds from the Bond Issue shall be applied in accordance with the Sustainability Bond Framework.

The Sustainability Bond Framework has been developed in line with the industry standard Sustainability Bond Guidelines 2021 set by the International Capital Markets Association (ICMA), which in turn are based on the Green Bond Principles 2021 and Social Bond Principles 2021, and has undergone an independent evaluation by the ISS ESG, which is available on the Issuer’s website. ISS ESG’s review focuses on the sustainability quality of the Issuer and Sustainability Bond Framework and, amongst others, on the compatibility of the Sustainability Bond Framework with the recommended components of the ICMA Sustainability Bond Guidelines, which are described below:

- (i) Use of Proceeds;
- (ii) Process for Project Evaluation and Selection;
- (iii) Management of Proceeds
- (iv) Reporting; and
- (v) External Review.

In the second party opinion ISS ESG states that the Issuer has defined a formal concept for its Sustainable Financing Instruments regarding use of proceeds, processes for project evaluation and selection, management of proceeds and reporting. ISS ESG further confirms that the Sustainability Bond Framework is aligned with ICMA’s Sustainability Bond Guidelines, as well as the Green Bond Principles and Social Bond Principles, as of June 2021, and the Loan Market Association’s (LMA) Green Loan Principles and Social Loan Principles, as of June 2021. The ISS ESG second party opinion was published on 7 April 2022 and will remain valid and relevant to all Sustainability Bonds issued under the Sustainability Bond Framework as long as there is no material change to the Sustainability Bond Framework.

ISS ESG states in its second party opinion that the selection criteria have good sustainability benefits, risk avoidance, and minimization based on their assessment, and rates the Sustainability Bond Framework as Positive.

The ISS ESG second party opinion methodology is designed to assist companies and institutions issuing sustainable bonds by advising them on the categories of projects to be financed, helping them to define ambitious criteria, and providing transparency to investors seeking to understand and act on potential exposure to sustainability risks and impacts. ISS ESG’s second party opinion does not form part of this Prospectus nor is it a recommendation to buy, sell or hold Bonds. Any future lack

of verification from ISS ESG or another independent party does not entail an event of default under the Terms & Conditions. In such cases, Bondholders do not have the right to prepayment or repurchase of a Bond or other compensation.

Regarding the use of proceeds, an amount equal to the net proceeds of the Bond Issue shall be used to finance or re-finance, Eligible Assets providing distinct environmental benefits (“**Green Eligible Assets**”) and/or social benefits (“**Social Eligible Assets**”). The Company will continuously exercise its professional judgement, discretion and sustainability expertise when identifying the Eligible Assets. The proceeds of the Bond Issue may not be used to finance either fossil fuel energy generation, nuclear energy generation, weapons, and defence industries nor potentially environmentally negative resource extraction, gambling, or tobacco.

The Green Eligible Assets include (i) green & energy efficient buildings and (ii) energy efficiency. Regarding (i), the funds can be used to finance or refinance new buildings and major renovations or existing buildings that meet specific requirements for green certification and energy consumption defined in the Sustainability Bond Framework. Regarding (ii), the funds can be used to finance or refinance energy retrofits such as installation of solar panels, heating pumps, improvements in ventilation systems, extension of district heating and cooling systems, improvements, and implementation of control systems, as well as activities enabling renewable energy.

The Social Eligible Assets include access to essential services. In this regard, the funds can be used to finance or refinance community service buildings (new buildings, major renovations & existing buildings) such as nursing homes, group housing (Sw. *LSS-boenden*) and school properties. According to the ISS ESG second party opinion, the use of proceeds financed through the Bond Issue are consistent with the Issuer’s sustainability strategy and material ESG topics for the Issuer’s industry and the rationale for issuing Sustainability Bonds is clearly described by the Issuer.

The evaluation and selection process for Green Eligible Assets and Social Eligible Assets is a key process in ensuring that the amount equivalent to the net proceeds from the Bond Issue are allocated to assets and expenditures which meet the criteria in the Sustainability Bond Framework. The process involves screening Green Eligible Assets and Social Eligible Assets to ensure compliance with the sustainability criteria of the Sustainability Bond Framework and relevant policies and guidelines. As part of the selection process of Green Eligible Assets and Social Eligible Assets the Issuer has established a dedicated group, the Sustainability Finance Committee (the “SFC”), which is composed of the Chief Executive Officer, the Chief Financial Officer, and the Construction Manager.

The Company will assure that the sustainability expertise always relies within the SFC and all decisions, including the selection process of Green Eligible Assets and Social Eligible Assets, are made through consensus. The finance department is responsible for maintaining an up-to-date list of Green Eligible Assets and Social Eligible Assets, which is monitored on a regular basis during to ensure that the proceeds are sufficiently allocated to Green Eligible Assets and Social Eligible Assets. This is also a responsibility of the SFC. Any unallocated proceeds may be temporary held by Company and placed on the Company’s ordinary bank account. Such event does not entail an event of default under the Terms and Conditions. In such cases, Bondholders do not have the right to prepayment or repurchase of a Bond or other compensation.

To be fully transparent towards investors and other stakeholders, the Issuer commits to regular reporting until no Bonds are outstanding. Information on the use of proceeds will be renewed annually until full allocation, and on a timely basis in case of material developments. The report will be published on the Issuer's website; [www.sehlhall.se](http://www.sehlhall.se) on an annual basis. Allocation of proceeds reporting will also be subject to an annual review by an external part/verifier. The verification report provided by the external part will be published on Issuer's website [www.sehlhall.se](http://www.sehlhall.se). Inadequate or non-existent reporting by the Issuer as described above does not entail an event of default under the Terms & Conditions. In such cases, Bondholders do not have the right to prepayment or repurchase of a Bond or other compensation.

The European Council and the European Parliament made a political agreement in December 2019 regarding the so-called taxonomy regulation (Regulation EU 2020/852) concerning a harmonised classification system with rules as regards the assessment of green and sustainable investments (the "**Taxonomy Regulation**"). The Issuer aims to ensure that the Sustainability Bond Framework as far as possible be compatible with the Taxonomy Regulation.

### ***Corporate Governance***

#### ***Governance***

The Group's corporate governance is aimed at ensuring that the Company and the Group are managed as responsibly, efficiently and sustainably as possible. Furthermore, the purpose of corporate governance is to provide order and systematisation for the board of directors, management and external stakeholders. By establishing a clear structure and efficient processes, the board can ensure that the management and organization focus on developing the company's operations and business in the desired strategic direction. In its decision making and administration, in order to ensure that control over the Company and the Group are not abused, the Company and the Group follow the provisions of applicable law and relevant regulations, entailing, *inter alia*, that the Board of Directors and the shareholders in each company observes the rules regarding corporate governance in the Swedish Companies Act (Sw. *aktiebolagslagen* (2005:551)), and that the shareholders exercise their influence through active participation in the decisions made at the shareholder' meeting. Further, each Group Company's Articles of Association are observed.

The Group has further implemented policies to ensure that roles and responsibilities are divided between the respective Group management, Board of Directors and shareholders in accordance with applicable laws and regulations. The Group has *inter alia*, adopted the following policies: the “*Finance Policy*”, the “*Risk Management Policy*”, the “*Codes of conduct*” and the “*Sustainability Policy*”. All instructions and policies are revised annually. Audit and remuneration issues are managed by the relevant Board of Directors by its appointed board members.

There are currently no committees in existence.

#### ***Conflict of interest***

The Main Shareholders, Dan T. Sehlberg och Petter Hallenberg, are not independent in relation to the Issuer, the Guarantor or management, and not independent in relation to the Issuer’s major shareholders. Dan Sehlberg owns 30 per cent of the votes and 13 per cent of the capital and Petter Hallenberg owns 30 per cent of the votes and 13 of the capital in the Issuer. Thus, the Main Shareholders have financial interests in the Issuer and the Guarantor as a consequence of their holdings of shares in the Issuer.

The Group is not aware of any other conflicts of interests or potential conflicts of interest between the duties of the members of the Board of Directors and the members of management towards the Company or the Guarantor, respectively, and their private interests and/or other duties. However, in addition to the Main Shareholders, several members of the Board of Directors and company management have certain financial interests in the Company and the Guarantor as a consequence of their holdings of shares in the Company.

Furthermore, the Group’s strategy of investing in joint ventures may lead to conflicts of interest (*see Risk factors “Loans to subsidiaries not wholly-owned by the Issuer and other companies where the Issuer, directly or indirectly hold a minority interest”*). This is because a JV Company may be controlled by a majority shareholder which is not, directly or indirectly, wholly owned by the Issuer and whose interests may conflict with those of the Group and the Bondholders, particularly if such JV Company is in difficulty or is unable to pay its debts as they fall due. However, the Group is not currently aware of any such conflicts of interest.

#### **Auditor**

The Issuer’s and the Guarantor’s auditor is presently Öhrling PricewaterhouseCoopers AB with authorised auditor Magnus Thorling as the auditor in charge for the Issuer, the Guarantor and each of its Subsidiaries.

Öhrling PricewaterhouseCoopers AB was re-elected as auditor of the Issuer at the annual general meeting held on 25 May 2023, and at the Guarantor’s annual general meeting, held on 28 April 2023, for the time until the end of their annual general meetings 2024.

For the purposes of a second Bondholders' Meeting or second Written Procedure pursuant to this Clause 17.4.7, the date of request of the second Bondholders' Meeting pursuant to Clause 17.2.1 or second Written Procedure pursuant to Clause 17.3.1, as the case may be, shall be deemed to be the relevant date when the quorum did not exist. The quorum requirement in Clause 17.4.5 shall not apply to such second Bondholders' Meeting or Written Procedure.

- 17.4.8 Any decision which extends or increases the obligations of the Issuer or the Agent, or limits, reduces or extinguishes the rights or benefits of the Issuer or the Agent, under the Finance Documents shall be subject to the Issuer's or the Agent's consent, as applicable.
- 17.4.9 A Bondholder holding more than one Bond need not use all its votes or cast all the votes to which it is entitled in the same way and may in its discretion use or cast some of its votes only.
- 17.4.10 The Issuer may not, directly or indirectly, pay or cause to be paid any consideration to or for the benefit of any owner of Bonds (irrespective of whether such person is a Bondholder) for or as inducement to any consent under these Terms and Conditions, unless such consideration is offered to all Bondholders that vote in respect of the proposal at the relevant Bondholders' Meeting or in a Written Procedure within the time period stipulated for the consideration to be payable (such time period to be no less than ten (10) Business Days).
- 17.4.11 A matter decided at a duly convened and held Bondholders' Meeting or by way of Written Procedure is binding on all Bondholders, irrespective of them being present or represented at the Bondholders' Meeting or responding in the Written Procedure. The Bondholders that have not adopted or voted for a decision shall not be liable for any damages that this may cause the Issuer or the other Bondholders.
- 17.4.12 All costs and expenses incurred by the Issuer or the Agent for the purpose of convening a Bondholders' Meeting or for the purpose of carrying out a Written Procedure, including reasonable fees to the Agent, shall be paid by the Issuer.

The Agent shall not be responsible for the accuracy of such certificate or otherwise be responsible for determining whether a Bond is owned by a Group Company or an Affiliate of a Group Company.
- 17.4.14 Information about decisions taken at a Bondholders' Meeting or by way of a Written Procedure shall promptly be published on the websites of the Group and the Agent, provided that a failure to do so shall not invalidate any decision made or voting result achieved. The minutes from the relevant Bondholders' Meeting or Written Procedure shall at the request of a Bondholder be sent to it by the Issuer or the Agent, as applicable.

## **18 Amendments and waivers**

- 18.1 The Issuer, any other relevant Group Company and the Agent (acting on behalf of the Bondholders) may agree in writing to amend and waive any provision in a Finance

Document or any other document relating to the Bonds, provided that the Agent is satisfied that such amendment or waiver:

- (a) is not detrimental to the interest of the Bondholders as a group;
- (b) is made solely for the purpose of rectifying obvious errors and mistakes;
- (c) is required by any applicable regulation, a court ruling or a decision by a relevant authority;
- (d) has been duly approved by the Bondholders in accordance with Clause 17 (*Decisions by Bondholders*) and it has received any conditions precedent specified for the effectiveness of the approval by the Bondholders; or
- (e) is made pursuant to Clause 19 (*Replacement of Base Rate*).

- 18.2 Any amendments to the Finance Documents shall be made available in the manner stipulated in Clause 12.4 (*Publication of Finance Documents*). The Issuer shall ensure that any amendments to the Finance Documents are duly registered with the CSD and each other relevant organisation or authority. The Issuer shall promptly publish by way of press release any amendment or waiver made pursuant to Clause 18.1(a) or (c), in each case setting out the amendment in reasonable detail and the date from which the amendment or waiver will be effective.
- 18.3 An amendment to the Finance Documents shall take effect on the date determined by the Bondholders' Meeting, in the Written Procedure or by the Agent, as the case may be.

## **19 Replacement of Base Rate**

### **19.1 General**

- 19.1.1 Any determination or election to be made by an Independent Adviser, the Issuer or the Bondholders in accordance with the provisions of this Clause 19 shall at all times be made by such Independent Adviser, the Issuer or the Bondholders (as applicable) acting in good faith, in a commercially reasonable manner and by reference to relevant market data.

- 19.1.2 If a Base Rate Event has occurred, this Clause 19 shall take precedent over the fallbacks set out in paragraph (b) to (d) of the definition of STIBOR.

### **19.2 Definitions**

In this Clause 19:

**“Adjustment Spread”** means a spread (which may be positive, negative or zero) or a formula or methodology for calculating a spread, or a combination thereof to be applied to a Successor Base Rate and that is:

- (a) formally recommended by any Relevant Nominating Body in relation to the replacement of the Base Rate; or

- (b) if (a) is not applicable, the adjustment spread that the Independent Adviser determines is reasonable to use in order to eliminate, to the extent possible, any transfer of economic value from one party to another as a result of a replacement of the Base Rate and is customarily applied in comparable debt capital market transactions.

“**Base Rate Amendments**” has the meaning set forth in Clause 19.3.4.

“**Base Rate Event**” means one or several of the following circumstances:

- (a) the Base Rate (for the relevant Interest Period) has ceased to exist or ceased to be published for at least five (5) consecutive Business Days as a result of the Base Rate (for the relevant Interest Period) ceasing to be calculated or administered;
- (b) a public statement or publication of information by (i) the supervisor of the Base Rate Administrator or (ii) the Base Rate Administrator that the Base Rate Administrator ceases to provide the applicable Base Rate (for the relevant Interest Period) permanently or indefinitely and, at the time of the statement or publication, no successor administrator has been appointed or is expected to be appointed to continue to provide the Base Rate;
- (c) a public statement or publication of information in each case by the supervisor of the Base Rate Administrator that the Base Rate (for the relevant Interest Period) is no longer representative of the underlying market which the Base Rate is intended to represent and the representativeness of the Base Rate will not be restored in the opinion of the supervisor of the Base Rate Administrator;
- (d) a public statement or publication of information in each case by the supervisor of the Base Rate Administrator with the consequence that it is unlawful for the Issuer or the Issuing Agent to calculate any payments due to be made to any Bondholder using the applicable Base Rate (for the relevant Interest Period) or it has otherwise become prohibited to use the applicable Base Rate (for the relevant Interest Period);
- (e) a public statement or publication of information in each case by the bankruptcy trustee of the Base Rate Administrator or by the trustee under the bank recovery and resolution framework (*Sw. krishanteringsregelverket*) containing the information referred to in (b) above; or
- (f) a Base Rate Event Announcement has been made and the announced Base Rate Event as set out in (b) to (e) above will occur within six (6) months.

“**Base Rate Event Announcement**” means a public statement or published information as set out in paragraph (b) to (e) of the definition of Base Rate Event that any event or circumstance specified therein will occur.

“**Independent Adviser**” means an independent financial institution or adviser of repute in the debt capital markets where the Base Rate is commonly used.

**“Relevant Nominating Body”** means, subject to applicable law, firstly any relevant supervisory authority, secondly any applicable central bank, or thirdly any working group or committee of any of them, or the Financial Stability Council (*Finansiella stabilitetsrådet*) or any part thereof.

**“Successor Base Rate”** means:

- (a) a screen or benchmark rate, including the methodology for calculating term structure and calculation methods in respect of debt instruments with similar interest rate terms as the Bonds, which is formally recommended as a successor to or replacement of the Base Rate by a Relevant Nominating Body; or
- (b) if there is no such rate as described in paragraph (a), such other rate as the Independent Adviser determines is most comparable to the Base Rate.

For the avoidance of doubt, in the event that a Successor Base Rate ceases to exist, this definition shall apply *mutatis mutandis* to such new Successor Base Rate.

### **19.3 Determination of Base Rate, Adjustment Spread and Base Rate Amendments**

- 19.3.1 Without prejudice to Clause 19.3.2, upon a Base Rate Event Announcement, the Issuer may, if it is possible to determine a Successor Base Rate at such point of time, at any time before the occurrence of the relevant Base Rate Event at the Issuer’s expense appoint an Independent Adviser to initiate the procedure to determine a Successor Base Rate, the Adjustment Spread and any Base Rate Amendments for purposes of determining, calculating and finally deciding the applicable Base Rate. For the avoidance of doubt, the Issuer will not be obliged to take any such actions until obliged to do so pursuant to Clause 19.3.2.
- 19.3.2 If a Base Rate Event has occurred, the Issuer shall use all commercially reasonable endeavours to, as soon as reasonably practicable and at the Issuer’s expense, appoint an Independent Adviser to initiate the procedure to determine, as soon as commercially reasonable, a Successor Base Rate, the Adjustment Spread and any Base Rate Amendments for purposes of determining and calculating, and finally deciding the applicable Base Rate.
- 19.3.3 If the Issuer fails to appoint an Independent Adviser in accordance with Clause 19.3.2, the Bondholders shall, if so decided at a Bondholders’ Meeting or by way of Written Procedure, be entitled to appoint an Independent Adviser (at the Issuer’s expense) for the purposes set forth in Clause 19.3.2. If an Event of Default has occurred and is continuing, or if the Issuer fails to carry out any other actions set forth in Clause 19.3 to 19.6, the Agent (acting on the instructions of the Bondholders) may to the extent necessary effectuate any Base Rate Amendments without the Issuer’s cooperation.
- 19.3.4 The Independent Adviser shall also initiate the procedure to determine any technical, administrative or operational changes required to ensure the proper operation of a

Successor Base Rate or to reflect the adoption of such Successor Base Rate in a manner substantially consistent with market practice (“**Base Rate Amendments**”).

- 19.3.5 Provided that a Successor Base Rate, the applicable Adjustment Spread and any Base Rate Amendments have been finally decided no later than prior to the relevant Quotation Day in relation to the next succeeding Interest Period, they shall become effective with effect from and including the commencement of the next succeeding Interest Period, always subject to any technical limitations of the CSD and any calculations methods applicable to such Successor Base Rate.

#### **19.4 Interim measures**

- 19.4.1 If a Base Rate Event set out in any of the paragraphs (a) to (e) of the Base Rate Event definition has occurred but no Successor Base Rate and Adjustment Spread have been finally decided prior to the relevant Quotation Day in relation to the next succeeding Interest Period or if such Successor Base Rate and Adjustment Spread have been finally decided but due to technical limitations of the CSD, cannot be applied in relation to the relevant Quotation Day, the Interest Rate applicable to the next succeeding Interest Period shall be:
- (a) if the previous Base Rate is available, determined pursuant to the terms that would apply to the determination of the Base Rate as if no Base Rate Event had occurred; or
  - (b) if the previous Base Rate is no longer available or cannot be used in accordance with applicable law or regulation, equal to the Interest Rate determined for the immediately preceding Interest Period.

- 19.4.2 For the avoidance of doubt, Clause 19.4.1 shall apply only to the relevant next succeeding Interest Period and any subsequent Interest Periods are subject to the subsequent operation of, and to adjustments as provided in, this Clause 19. This will however not limit the application of Clause 19.4.1 for any subsequent Interest Periods, should all relevant actions provided in this Clause 19 have been taken, but without success.

#### **19.5 Notices etc.**

Prior to the Successor Base Rate, the applicable Adjustment Spread and any Base Rate Amendments become effective, the Issuer shall promptly, following the final decision by the Independent Adviser of any Successor Base Rate, Adjustment Spread and any Base Rate Amendments, give notice thereof to the Agent, the Issuing Agent and the Bondholders in accordance with Clause 25 (*Notices and press releases*) and the CSD. The notice shall also include information about the effective date of the amendments. If the Bonds are admitted to trading on a stock exchange, the Issuer shall also give notice of the amendments to the relevant stock exchange.

## **19.6 Variation upon replacement of Base Rate**

- 19.6.1 No later than giving the Agent notice pursuant to Clause 19.5, the Issuer shall deliver to the Agent a certificate signed by the Independent Adviser and the CEO, CFO or any other duly authorised signatory of the Issuer (subject to Clause 19.3.3) confirming the relevant Successor Base Rate, the Adjustment Spread and any Base Rate Amendments, in each case as determined and decided in accordance with the provisions of this Clause 19. The Successor Base Rate, the Adjustment Spread and any Base Rate Amendments (as applicable) specified in such certificate will, in the absence of manifest error or bad faith in any decision, be binding on the Issuer, the Agent, the Issuing Agent and the Bondholders.
- 19.6.2 Subject to receipt by the Agent of the certificate referred to in Clause 19.6.1, the Issuer and the Agent shall, at the request and expense of the Issuer, without the requirement for any consent or approval of the Bondholders, without undue delay effect such amendments to the Finance Documents as may be required by the Issuer in order to give effect to this Clause 19.
- 19.6.3 The Agent and the Issuing Agent shall always be entitled to consult with external experts prior to amendments are effected pursuant to this Clause 19. Neither the Agent nor the Issuing Agent shall be obliged to concur if in the reasonable opinion of the Agent or the Issuing Agent (as applicable), doing so would impose more onerous obligations upon it or expose it to any additional duties, responsibilities or liabilities or reduce or amend the protective provisions afforded to the Agent or the Issuing Agent in the Finance Documents.

## **19.7 Limitation of liability for the Independent Adviser**

Any Independent Adviser appointed pursuant to Clause 19.3 shall not be liable whatsoever for damage or loss caused by any determination, action taken or omitted by it under or in connection with any Finance Document, unless directly caused by its gross negligence or wilful misconduct. The Independent Adviser shall never be responsible for indirect or consequential loss.

## **20 The Agent**

### **20.1 Appointment of the Agent**

- 20.1.1 By subscribing for Bonds, each initial Bondholder appoints the Agent to act as its agent in all matters relating to the Bonds and the Finance Documents, and authorises the Agent to act on its behalf (without first having to obtain its consent, unless such consent is specifically required by these Terms and Conditions) in any legal or arbitration proceedings relating to the Bonds held by such Bondholder, including the winding-up, dissolution, liquidation, company reorganisation (*företagsrekonstruktion*) or bankruptcy (*konkurs*) (or its equivalent in any other jurisdiction) of the Issuer, any legal or arbitration

proceeding relating to the perfection, preservation, protection or enforcement of the Transaction Security of the Guarantee and in relation to any mandatory exchange of the Bonds for other securities (including, for the avoidance of doubt, a right for the Agent to subscribe for any such new securities on behalf of the relevant Bondholder). By acquiring Bonds, each subsequent Bondholder confirms such appointment and authorisation for the Agent to act on its behalf.

- 20.1.2 Each Bondholder shall immediately upon request provide the Agent with any such documents, including a written power of attorney (in form and substance satisfactory to the Agent), that the Agent deems necessary for the purpose of exercising its rights and/or carrying out its duties under the Finance Documents. The Agent is under no obligation to represent a Bondholder which does not comply with such request.
- 20.1.3 The Issuer shall promptly upon request provide the Agent with any documents and other assistance (in form and substance satisfactory to the Agent), that the Agent deems necessary for the purpose of exercising its rights and/or carrying out its duties under the Finance Documents.
- 20.1.4 The Agent is entitled to fees for all its work in such capacity and to be indemnified for costs, losses and liabilities on the terms set out in the Finance Documents and the Agency Agreement and the Agent's obligations as Agent under the Finance Documents are conditioned upon the due payment of such fees and indemnifications.
- 20.1.5 The Agent may act as agent or trustee for several issues of securities or other loans issued by or relating to the Issuer and other Group Companies notwithstanding potential conflicts of interest.

## **20.2 Duties of the Agent**

- 20.2.1 The Agent shall represent the Bondholders in accordance with the Finance Documents, including, *inter alia*, holding the Transaction Security and the Guarantee pursuant to the Security Documents and the Guarantee Agreement (as applicable) on behalf of the Bondholders and, where relevant, enforcing the Transaction Security and the Guarantee on behalf of the Bondholders. The Agent shall provide reasonable assistance to a Bondholders' Committee and participate in its meetings.
- 20.2.2 When acting pursuant to the Finance Documents, the Agent is always acting with binding effect on behalf of the Bondholders. The Agent is never acting as an advisor to the Bondholders or the Issuer. Any advice or opinion from the Agent does not bind the Bondholders or the Issuer.
- 20.2.3 When acting pursuant to the Finance Documents, the Agent shall carry out its duties with reasonable care and skill in a proficient and professional manner.
- 20.2.4 The Agent shall treat all Bondholders equally and, when acting pursuant to the Finance Documents, act with regard only to the interests of the Bondholders as a group and shall

not be required to have regard to the interests or to act upon or comply with any direction or request of any other person, other than as explicitly stated in the Finance Documents.

- 20.2.5 The Agent is always entitled to delegate its duties to other professional parties and to engage external experts when carrying out its duties as agent, without having to first obtain any consent from the Bondholders or the Issuer. The Agent shall, however, remain liable for any actions of such parties if such parties are performing duties of the Agent under the Finance Documents.
- 20.2.6 The Issuer shall on demand by the Agent pay all costs for external experts engaged by it:
- (a) after the occurrence of an Event of Default;
  - (b) for the purpose of investigating or considering:
    - (i) an event or circumstance which the Agent reasonably believes is or may lead to an Event of Default; or
    - (ii) a matter relating to the Issuer or the Finance Documents which the Agent reasonably believes may be detrimental to the interests of the Bondholders under the Finance Documents;
  - (c) in connection with any Bondholders' Meeting or Written Procedure; or
  - (d) in connection with any amendment (whether contemplated by the Finance Documents or not) or waiver under the Finance Documents (including for the purpose of deciding whether the conditions set out in Clause 18.1 are fulfilled).
- 20.2.7 Any compensation for damages or other recoveries received by the Agent from external experts engaged by it for the purpose of carrying out its duties under the Finance Documents shall be distributed in accordance with Clause 16 (*Distribution of proceeds*).
- 20.2.8 The Agent shall, as applicable, enter into agreements with the CSD, and comply with such agreement and the CSD Regulations applicable to the Agent, as may be necessary in order for the Agent to carry out its duties under the Finance Documents.
- 20.2.9 Other than as specifically set out in the Finance Documents, the Agent shall not be obliged to monitor (a) whether any Event of Default has occurred, (b) the financial condition of the Issuer and the Group, (c) the performance, default or any breach by the Issuer or any other party of its obligations under the Finance Documents, or (d) whether any other event specified in any Finance Document has occurred or is expected to occur, and should the Agent not receive such information, the Agent is entitled to assume that no such event or circumstance exists or can be expected to occur, provided that the Agent does not have actual knowledge of such event or circumstance.
- 20.2.10 The Agent shall (a) review each Compliance Certificate delivered to it to determine that it meets the requirements set out in Clause 12.1.7 and Schedule 2 (Form of Compliance Certificate) and as otherwise agreed between the Issuer and the Agent, and (b) verify that the Issuer according to its reporting in the Compliance Certificate meets the Maintenance Test and the Issuer shall promptly upon request provide the Agent with such information

as the Agent reasonably considers necessary for the purpose of being able to comply with this Clause 20.2.10.

- 20.2.11 The Agent shall ensure that it receives evidence satisfactory to it that Finance Documents which are required to be delivered to the Agent are duly authorised and executed (as applicable). The Issuer shall promptly upon request provide the Agent with such documents and evidence as the Agent reasonably considers necessary for the purpose of being able to comply with this Clause 20.2.11. Other than as set out above, the Agent shall neither be liable to the Issuer or the Bondholders for damage due to any documents and information delivered to the Agent not being accurate, correct and complete, unless it has actual knowledge to the contrary, nor be liable for the content, validity, perfection or enforceability of such documents.
- 20.2.12 Notwithstanding any other provision of the Finance Documents to the contrary, the Agent is not obliged to do or omit to do anything if it would or might in its reasonable opinion constitute a breach of any regulation.
- 20.2.13 If in the Agent's reasonable opinion the cost, loss or liability which it may incur (including reasonable fees to the Agent) in complying with instructions of the Bondholders, or taking any action at its own initiative, will not be covered by the Issuer, the Agent may refrain from acting in accordance with such instructions, or taking such action, until it has received such funding or indemnities (or adequate Security has been provided therefore) as it may reasonably require.
- 20.2.14 The Agent shall give a notice to the Bondholders:
- (a) before it ceases to perform its obligations under the Finance Documents by reason of the non-payment by the Issuer of any fee or indemnity due to the Agent under the Finance Documents or the Agency Agreement; or
  - (b) if it refrains from acting for any reason described in Clause 20.2.13.

### **20.3 Liability for the Agent**

- 20.3.1 The Agent will not be liable to the Bondholders for damage or loss caused by any action taken or omitted by it under or in connection with any Finance Document, unless directly caused by its negligence or wilful misconduct. The Agent shall never be responsible for indirect or consequential loss.
- 20.3.2 The Agent shall not be considered to have acted negligently if it has acted in accordance with advice from or opinions of reputable external experts provided to the Agent or if the Agent has acted with reasonable care in a situation when the Agent considers that it is detrimental to the interests of the Bondholders to delay the action in order to first obtain instructions from the Bondholders.
- 20.3.3 The Agent shall not be liable for any delay (or any related consequences) in crediting an account with an amount required pursuant to the Finance Documents to be paid by the Agent to the Bondholders, provided that the Agent has taken all necessary steps as soon

as reasonably practicable to comply with the regulations or operating procedures of any recognised clearing or settlement system used by the Agent for that purpose.

- 20.3.4 The Agent shall have no liability to the Issuer or the Bondholders for damage caused by the Agent acting in accordance with instructions of the Bondholders given in accordance with the Finance Documents.
- 20.3.5 Any liability towards the Issuer which is incurred by the Agent in acting under, or in relation to, the Finance Documents shall not be subject to set-off against the obligations of the Issuer to the Bondholders under the Finance Documents.

## **20.4 Replacement of the Agent**

- 20.4.1 Subject to Clause 20.4.6, the Agent may resign by giving notice to the Issuer and the Bondholders, in which case the Bondholders shall appoint a successor Agent at a Bondholders' Meeting convened by the retiring Agent or by way of Written Procedure initiated by the retiring Agent.
- 20.4.2 Subject to Clause 20.4.6, if the Agent is Insolvent, the Agent shall be deemed to resign as Agent and the Issuer shall within ten (10) Business Days appoint a successor Agent which shall be an independent financial institution or other reputable company which regularly acts as agent under debt issuances.
- 20.4.3 A Bondholder (or Bondholders) representing at least ten (10.00) per cent. of the Adjusted Nominal Amount may, by notice to the Issuer (such notice shall, if given by several Bondholders, be given by them jointly), require that a Bondholders' Meeting is held for the purpose of dismissing the Agent and appointing a new Agent. The Issuer may, at a Bondholders' Meeting convened by it or by way of Written Procedure initiated by it, propose to the Bondholders that the Agent be dismissed and a new Agent appointed.
- 20.4.4 If the Bondholders have not appointed a successor Agent within ninety (90) days after:
  - (a) the earlier of the notice of resignation was given or the resignation otherwise took place; or
  - (b) the Agent was dismissed through a decision by the Bondholders,the Issuer shall within thirty (30) days thereafter appoint a successor Agent which shall be an independent financial institution or other reputable company with the necessary resources to act as agent in respect of Market Loans.
- 20.4.5 The retiring Agent shall, at its own cost, make available to the successor Agent such documents and records and provide such assistance as the successor Agent may reasonably request for the purposes of performing its functions as Agent under the Finance Documents.
- 20.4.6 The Agent's resignation or dismissal shall only take effect upon the earlier of:

- (a) the appointment of a successor Agent and acceptance by such successor Agent of such appointment and the execution of all necessary documentation to effectively substitute the retiring Agent; and
  - (b) the period pursuant to Clause 20.4.4 having lapsed.
- 20.4.7 Upon the appointment of a successor, the retiring Agent shall be discharged from any further obligation in respect of the Finance Documents but shall remain entitled to the benefit of the Finance Documents and remain liable under the Finance Documents in respect of any action which it took or failed to take whilst acting as Agent. Its successor, the Issuer and each of the Bondholders shall have the same rights and obligations amongst themselves under the Finance Documents as they would have had if such successor had been the original Agent.
- 20.4.8 In the event that there is a change of the Agent in accordance with this Clause 20.4, the Issuer shall execute such documents and take such actions as the new Agent may reasonably require for the purpose of vesting in such new Agent the rights, powers and obligation of the Agent and releasing the retiring Agent from its further obligations under the Finance Documents and the Agency Agreement. Unless the Issuer and the new Agent agree otherwise, the new Agent shall be entitled to the same fees and the same indemnities as the retiring Agent.

## **21 The Issuing Agent**

- 21.1 The Issuer shall when necessary appoint an Issuing Agent to manage certain specified tasks under these Terms and Conditions and in accordance with the legislation, rules and regulations applicable to and/or issued by the CSD and relating to the Bonds. The replacing CSD must be authorised to professionally conduct clearing operations pursuant to the Central Securities Depository Regulation (Regulation (EU) No 909/2014) and be authorised as a central securities depository in accordance with the Financial Instruments Accounts Act.

Such steps may only be taken by the Agent.

23.2 Clause 23.1 shall not apply if the Agent has been instructed by the Bondholders in accordance with the Finance Documents to take certain actions but fails for any reason to take, or is unable to take (for any reason other than a failure by a Bondholder to provide documents in accordance with Clause 20.1.2), such actions within a reasonable period of time and such failure or inability is continuing.
